Michalis
Mouzakitis

Front-End Developer
&
Web Designer

PROFILE

Hi, my name is Michalis Mouzakitis and I'm a Front-End Web Developer and Designer. I was born in Chalkida, Evia, on 18/08/89.

When I was 7 I started playing video games. That was my first approach to computers and gaming-consoles. I was a passionate gamer and curious about how the graphics were made.

At the age of 17 i joined a 3D animation college. I got educated on the basic tools and options of 3D Studio Max and Photoshop.

Following my design studies, I graduated from an Electrical Engineering technical school and worked as an electrical apprentice (taking on the family business).

However my passion for design led me to follow-up on my previous studies on web design.

I have been working since 11/16 as a full-time Front-End Web Developer for Contadd and you can see a detailed portfolio both of my work at Contadd and in the area of 2D/3D Design further down this page.
